Office Action Summary	Application No. 10/769,546	Applicant(s) WELLS, JASON	
	Examiner Joseph W. Drodge	Art Unit 1723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 100-108 and 161-177, drawn to a process of purifying fluid passing through parallel membranes and backflushing the membranes, classified in class 210, subclass 636.
- II. Claims 178-183, drawn to a process for sampling the retentate of a membrane intermittently to form multiple samples, classified in class 73, subclass 863.23.
- III. Claims 184-191, drawn to a process for sampling the retentate from a plurality of separate membranes mounted in parallel, classified in class 436, subclass 178.

The inventions are independent or distinct, each from the other because:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as in processes for purifying fluids without analyzing or sampling any sample portion; while subcombination II, unlike the others can be practiced with a single membrane and subcombination III is different from I in that there is no requirement to wash or clean the membranes in any particular manner. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Andrew Wegman on May 31, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
